

NILFISK DIAMOND LINE
- FOR THE PERFECT RESULT

RENOVATES, CLEANS AND BUFFS

CLEAN, SHINY FLOORS

The Nilfisk Diamond Line saves time, is friendly to the environment and gives a better result. The method was developed for soft stone or concrete floors, but it also gives an excellent result on other floor types, such as plastic and linoleum, plus polished surfaces. It is best-suited to shops, foyers and other heavily-used surfaces which require not just cleanliness, but also a shiny, attractive surface.

THE ENVIRONMENT AND RESULT

This cleaning system requires no detergent for all daily cleaning tasks. The combination of pads and clean water give the perfect cleaning result and minimise residue. In heavily soiled areas or production zones, detergent can be added if required. Almost all Nilfisk combination machines can be fitted with the Ecoflex dosing system for non-chemical cleaning, allowing addition of detergent as required.

- Renovates old and worn floors and restores shine.
- Daily cleaning without detergents.
- Buffs floors to the shine you want

DIAMOND LINE RANGE

<p>STEP 1 - RED Use this pad to remove old and worn surfaces, leaving a matt finish.</p>		<p>STEP 3 - YELLOW A pad for daily cleaning which removes dirt and scratches, leaving a satin surface which is easy to keep clean.</p>	
<p>STEP 2 - BLUE Use this pad to remove scratches, cracks and unevenness, leaving a matt finish.</p>		<p>STEP 4 - GREEN A pad for daily cleaning which removes dirt and scratches, leaving a glossy surface. Dry-buff using a high-speed machine for a high gloss finish, depending on floor type.</p>
